Ideation Phase
Brainstorm & Idea Prioritization Template

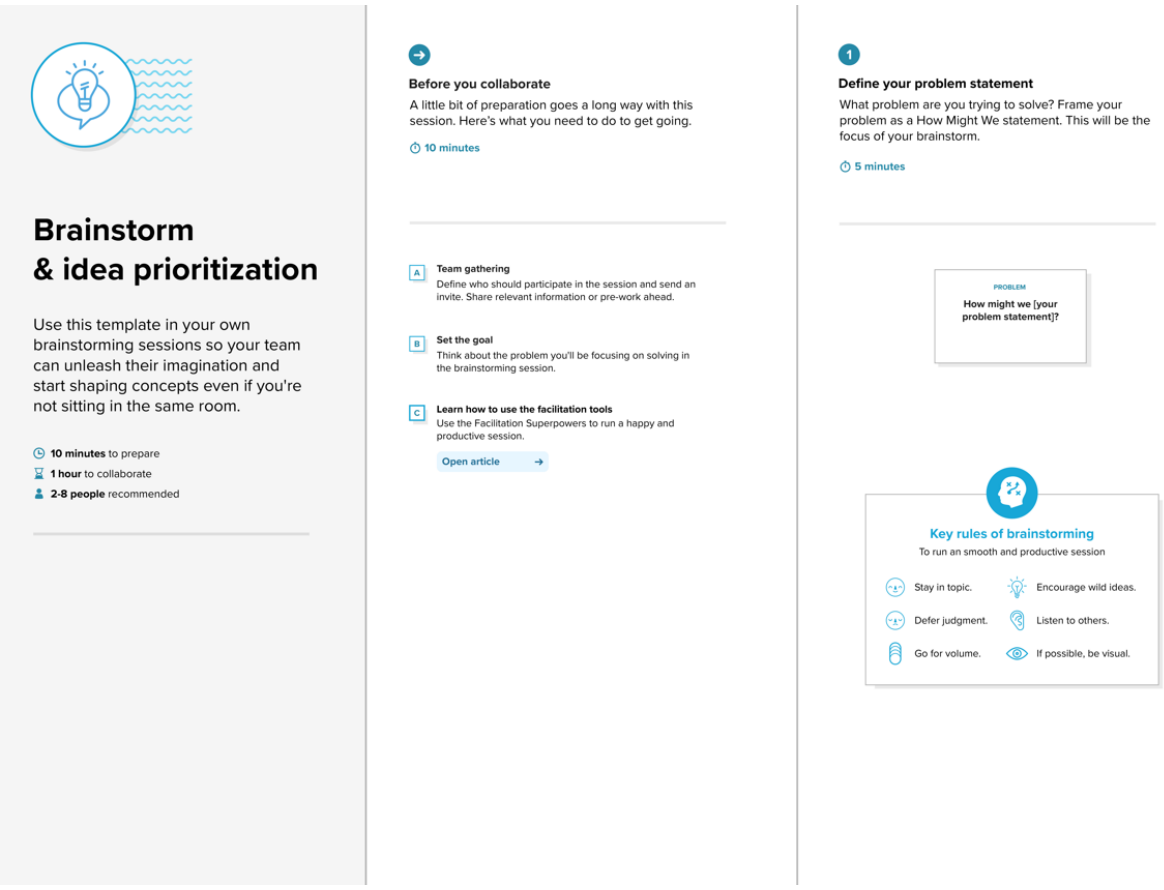
Date	25 February 2026
Team ID	LTVIP2026TMIDS41392
Project Name	AI-Powered Multi-Language Translator using Gemini
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

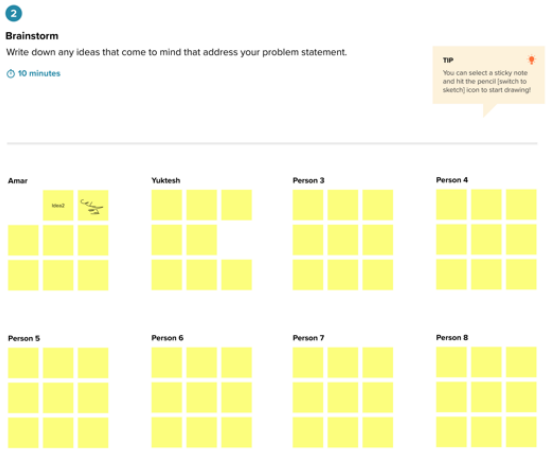
Brainstorming provides a free and open environment that encourages every team member involved in the **TransLingua: AI-Powered Multi-Language Translator** project to actively participate in the creative thinking process that leads to effective problem solving. By prioritizing idea generation over immediate evaluation, innovative and practical solutions for overcoming language barriers are explored. Creative ideas related to multilingual translation, AI integration, user experience, and accessibility are welcomed, refined, and expanded collaboratively by the team.

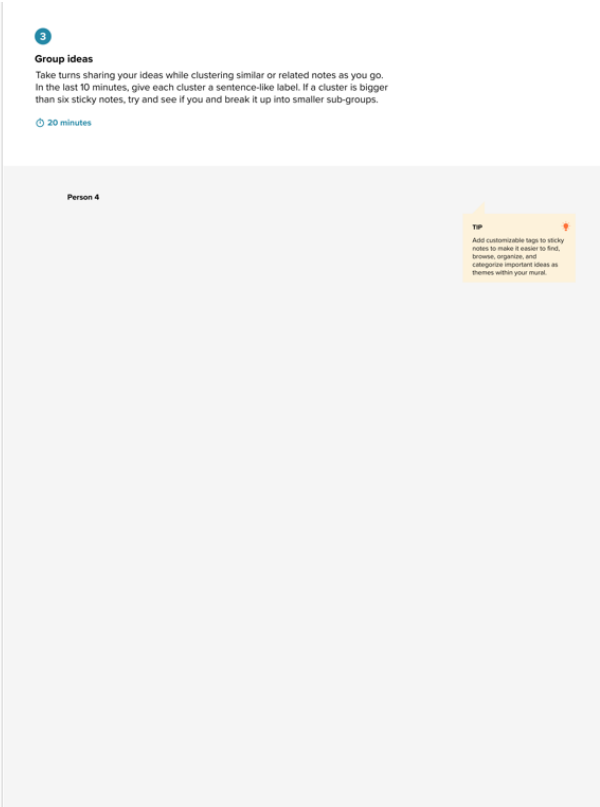
This template supports brainstorming sessions conducted during the development of TransLingua, allowing team members to share concepts, discuss improvements, and shape meaningful project features even when working remotely. The collaborative process helps transform initial ideas into structured solutions, enabling the team to design an intelligent, user-friendly language translation system that addresses real-world communication challenges.

Step-1: Team Gathering, Collaboration and Select the Problem Statement



Step-2: Brainstorm, Idea Listing and Grouping





Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.
