| Maximum Marks | 2 Marks |

**Problem – Solution Fit Template:**

The Problem–Solution Fit focuses on identifying communication challenges caused by language barriers and providing an effective solution through the **TransLingua: AI-Powered Multi-Language Translator**. The application enables users to translate text instantly using AI, improving communication, learning, and access to information. This solution helps understand user needs and delivers accurate multilingual translation to enhance accessibility and cross-language interaction.

**Purpose:**

❑ Solve language communication challenges in a way that aligns with user needs and real-world situations.
❑ Enable faster adoption of the translation solution by providing a simple and accessible web-based interface.
❑ Improve communication effectiveness through accurate AI-powered translation and clear user interaction.
❑ Increase user engagement by addressing frequent language barriers faced in education, travel, and professional communication.
❑ Understand existing communication difficulties and enhance the experience for users through intelligent translation technology.
